Independent Auditor's Report

To the Board of Directors and Stockholders of Senores Pharmaceuticals INC.

Opinion

We have audited the accompanying financial statement of Senores Pharmaceuticals INC., which comprise the statement of financial position as of March 31, 2025, and the related statement of profit or loss and other comprehensive income, statement of changes in equity and statement of cash flows for the year then ended, and the related notes to the financial statement.

In our opinion, the financial statement referred to above present fairly, in all material respects, the financial position of Senores Pharmaceuticals INC. as of March 31, 2025, and the results of its operations and its cash flow for the year ended in accordance with International Financial Reporting Standards as issued by the International Accounting Standards Board.

Basis for Opinion

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of Senores Pharmaceuticals INC. and to meet our other ethical responsibilities in accordance with the relevant ethical requirements relating to our audit. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the financial statements of the current period. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

I. Profit Sharing Revenues:

As described in Note 5 and 8 and 13 to the financial statements, the company recognizes revenue from product sales when obligations under the terms of contracts with the customers are satisfied. The company from time to time enters into arrangements for the sale of its products in the various markets. Under such arrangements, the company sells its products to the business partners at a base purchase price agreed upon in the arrangement and is also entitled to a profit share which is over and above the base purchase price. The profit share is typically dependent on the ultimate net sale proceeds or net profits, subject to any reductions or adjustments that are required by the terms of the arrangement.

In revenue in an amount equal to the base purchase price is recognized in these transactions upon delivery of products to the business partners. An additional amount representing the profit share component is recognized as revenue only to the extent that it is highly probable that a significant reversal will not occur.

exements are used to estimate the profit share component hence the matter is considered that the considere

S&T ASSOCIATES

Our audit procedures included the following:

- Evaluated the design and tested the operating effectiveness of the company controls over the completeness, recognition and measurement of accruals.
- Obtained and evaluated management's computations for accruals under respective contractual arrangements.
- Evaluated the key assumptions used by the company by comparing it with prior years.
- Analyzed the historical pattern of chargebacks, the inventory information and performed retrospective reviews in order to validate management's assumptions.
- Compared the assumptions in respect of rebates, discounts, allowances and returns to current payment trends.
- Evaluated adequacy of disclosures as required by applicable financial reporting framework.

II. Intangible Assets and Intangible Assets under development:

The company has significant intangible assets including intangibles under development. The company conducts an annual impairment testing of intangible assets. Significant judgements are used to estimate the recoverable amount of these intangible assets hence considered as a Key Audit Matter.

Our audit procedures included the following:

- Evaluated the design and tested the operating effectiveness of management's controls in assessing the carrying value of goodwill and intangible assets.
- Obtained the company's computation of recoverable amount and tested the mathematical accuracy and reasonableness of key assumptions.
- Obtained and evaluated management's sensitivity analysis to ascertain the impact of changes in key assumptions.
- Evaluated adequacy of disclosures as required by applicable financial reporting framework.

Other Matter

The Financial statements for the year ended March 31, 2024 were audited by another auditor who expressed an unmodified opinion on those statement on May 31, 2024.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with International Financial Reporting Standards as issued by the International Accounting Standards Board, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing Senores Pharmaceuticals INC.'s ability to continue as a going concern for at least twelve months from the end of the reporting period, disclosing, as applicable, matters related to going concern, and using the going concern basis of accounting, unless management either intends to liquidate Senores Pharmaceuticals INC. or to cease operations or has no realistic alternative but to do so.

S&T ASSOCIATES

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with generally accepted auditing standards will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with generally accepted auditing standards, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due
 to fraud or error, and design and perform audit procedures responsive to those risks. Such
 procedures include examining, on a test basis, evidence regarding the amounts and disclosures
 in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit
 procedures that are appropriate in the circumstances, but not for the purpose of expressing an
 opinion on the effectiveness of Senores Pharmaceuticals INC.'s internal control. Accordingly, no
 such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about Senores Pharmaceuticals INC.'s ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control related matters that we identified during the audit.

1. Organization and Operations

Senores Pharmaceuticals Inc. ("the company") is a Company limited by shares incorporated and registered in state of Delaware on January, 28 2021. Its ultimate holding company is Senores Pharmaceuticals limited (India). The address of the Company's office is 2877 Pearl Ridge Trace Buford, Georgia 30519. The principal activities of the company involves importation and sale of pharmaceutical products in various state of United States of America (USA).

2. Basis of Preparation and Presentation

Statement of Compliance

These financial statements are separate financial statements of the Company. The Company has prepared financial statements for the years ended March 31, 2025. The financial statements have been prepared in accordance with International Financial Reporting Standards (IFRS).

Basis of Preparation and Presentation

The financial statements have been prepared on the historical cost basis, except for the revaluation of certain properties and financial instruments that are measured at revalued amounts or fair values at the end of each reporting period, as explained in the accounting policies below. Historical cost is generally based on the fair value of the consideration given in exchange for goods and services.

Current v/s Non-Current Classification

The Company presents assets and liabilities in the balance sheet based on current / non-current classification.

An asset is treated as current when it is:

- Expected to be realized or intended to be sold or consumed in normal operating cycle
- Held primarily for the purpose of trading
- Expected to be realized within twelve months after the reporting period, or
- Cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period.

All other assets are classified as non-current.

A liability is current when:

- It is expected to be settled in normal operating cycle
- It is held primarily for the purpose of trading
- It is due to be settled within twelve months after the reporting period, or
- There is no unconditional right to defer the settlement of the liability for at least twelve months
 after the reporting period

The company classifies all other liabilities as non-current

Notes to the financial statement for the period ended March 31, 2025 (All amounts in USD)

2. Basis of Preparation and Presentation (Continued)

Estimates and Assumptions

The preparation of financial statements in conformity with International Financial Reporting Standards requires the use of certain critical accounting estimates. It also requires management to exercise its judgments in the process of applying the group's accounting policies. The areas involving a higher degree of judgments or complexity, or areas where assumptions and estimates are significant to the consolidated and/or separate financial statements are disclosed in the report.

The principal accounting policies applied in the preparation of annual financial statements are set out below. These policies have been consistently applied to all the years presented, unless otherwise stated.

Operating Cycle

Based on the nature of products/activities of the company and the normal time between acquisition of assets and their realization in cash or cash equivalents, the company has determined its operating cycle as 12 months for the purpose of classification of assets and liabilities as current and non-current.

Functional and Presentation Currency

US \$ is the functional and presentation currency.

IFRS Standards and Interpretations issued but not yet Adopted

The following is a list of the major new or amended IFRS standards and interpretations that the Company has not early adopted among those issued by the date of the approval of the Company's financial statements. The effect of the application of the new IFRS standard on the Company's financial statements is still under consideration.

	IFRS	Effective date (fiscal year beginning on or after)	The Group's application date (fiscal year ending)	Outline of new or amended IFRS standards and interpretations
IFRS 18	Presentation and Disclosure in Financial Statements	January 01, 2027	March 31, 2028	Introduces new requirement to improve companies' reporting of financial performance and give investors a better basis for analyzing and comparing companies.

Notes to the financial statement for the period ended March 31, 2025 (All amounts in USD)

3. Significant Accounting Policies

Intangible Assets

Research and development

Expenditure on research activities undertaken with the prospect of gaining new scientific or technical knowledge and understanding are recognized as an expense when incurred. Development activities involve a plan or design for the production of new or substantially improved products and processes. An internally-generated intangible asset arising from development is recognized if and only if all of the following have been demonstrated

- Development costs can be measured reliably;
- The product or process is technically and commercially feasible;
- · Future economic benefits are probable; and
- The Company intends to and has sufficient resources/ability to complete development and to use or sell the asset.

The expenditure to be capitalised include the cost of materials and other costs directly attributable to preparing the asset for its intended use. Other development expenditure is recognised in profit or loss as incurred.

Payments to third parties that generally take the form of up-front payments and milestones for inlicensed products, compounds and intellectual property are capitalised since the probability of expected future economic benefits criterion is always considered to be satisfied for separately acquired intangible assets.

Acquired research and development intangible assets which are under development, are recognized as Intangible assets. Intangible assets are not amortised, but evaluated for potential impairment on an annual basis or when there are indications that the carrying value may not be recoverable. Any impairment charge on such Intangible assets is recognized in profit or loss. Intangible assets relating to products under development, other intangible assets not available for use and intangible assets having indefinite useful life are tested for impairment annually, or more frequently when there is an indication that the assets may be impaired. All other intangible assets are tested for impairment when there are indications that the carrying value may not be recoverable.

The consideration for acquisition of intangible asset which is based on reaching specific milestone that are dependent on the Company's future activity is recognised only when the activity requiring the payment is performed.

Subsequent expenditures are capitalized only when they increase the future economic benefits embodied in the specific asset to which they relate. All other expenditures, including expenditures on internally generated goodwill and brands, are recognised in the statement of profit and loss as incurred.

Block of Assets	Useful life (Years)	
Intangible asset (Product Development)	20	19

Notes to the financial statement for the period ended March 31, 2025 (All amounts in USD)

3. Significant Accounting Policies (Continued)

Intangible Assets (Continued)

Amortization is recognized on a straight-line basis over the estimated useful lives of intangible assets. The estimated useful life and amortisation method are reviewed at the end of each reporting period by management, with the effect of any changes in estimate being accounted for on a prospective basis.

Intangible assets are de-recognized either on their disposal or where no future economic benefits are expected from their use. Gain or loss arising on such de-recognition is recognised in profit or loss, and are measured as the difference between the net disposal proceeds, if any, and the carrying amount of respective intangible assets as on the date of de-recognition.

Impairment of Intangible Assets

At the end of each quarter, the Group assesses whether there is any indication that its intangible assets may be impaired. If there is an indication of impairment, the recoverable amount of the asset is estimated. Intangible assets with indefinite useful lives or not yet available for use are tested for impairment annually at the same time each year irrespective of whether there is any indication of impairment.

When it is not possible to estimate the recoverable amount of an individual asset, the Group estimates the recoverable amount of the cash-generating unit to which the asset belongs. A cash-generating unit is the smallest identifiable group of assets that generates cash inflows that are largely independent of the cash inflows from other assets or groups of assets.

The recoverable amount is the higher of fair value less costs of disposal and value in use. In measuring the value in use, the estimated future cash flows are discounted to the present value using a discount rate that reflects the time value of money and the risks specific to the asset at the measurement date. The discount rate used for calculating the recoverable amount is set at a rate appropriate to each geographical area of operations.

If the recoverable amount of an asset or a cash-generating unit is less than its carrying amount, the carrying amount of the asset or the cash-generating unit is reduced to its recoverable amount, and the reduction is recognized in profit or loss as an impairment loss.

Reversal of Impairment

At the end of each quarter, the Group assesses whether there is any indication that an impairment loss recognized in prior years may no longer exist or may have decreased. If such indication exists, the recoverable amount of the asset or the cash-generating unit is estimated. If the recoverable amount of the asset or the cash-generating unit is greater than its carrying amount, a reversal of an impairment loss is recognized, to the extent the increased carrying amount does not exceed the carrying amount (net of amortization) that would have been determined had no impairment loss been recognized in prior years.

Notes to the financial statement for the period ended March 31, 2025 (All amounts in USD)

3. Significant Accounting Policies (Continued)

Financial Instruments

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

Financial asset is any asset that is:

- Cash;
- · Equity instrument of another entity;
- Contractual right to receive cash or another financial asset from another entity or to exchange financial assets or financial liabilities with another entity under conditions that are potentially favourable to the entity.
- Contract that will or may be settled in the entity's own equity instruments and is a non-derivative for which the entity is or may be obliged to receive a variable number of the entity's own equity instruments; or
- Derivative that will or may be settled other than by the exchange of a fixed amount of cash or another financial asset for a fixed number of the entity's own equity instruments.

Financial liability is any liability that is:

- Contractual obligation to deliver cash or another financial asset to another entity to exchange financial assets or financial liabilities with another entity under conditions that are potentially unfavorable to the entity.
- Contract that will or may be settled in the entity's own equity instruments and is a non-derivative for which the entity is or may be obliged to deliver a variable number of the entity's own equity instruments or a derivative that will or may be settled other than by the exchange of a fixed amount of cash or another financial asset for a fixed number of the entity's own equity instruments. For this purpose, rights, options or warrants to acquire a fixed number of the entity's own equity instruments for a fixed amount of any currency are equity instruments if the entity offers the rights, options or warrants pro rata to all of its existing owners of the same class of its own non-derivative equity instruments. Also, for these purposes the entity's own equity instruments do not include puttable financial instruments that are classified as equity instruments in accordance with paragraphs 16A and 16B, instruments that impose on the entity an obligation to deliver to another party a pro-rata share of the net assets of the entity only on liquidation and are classified as equity instruments in accordance with paragraphs 16C and 16D, or instruments that are contracts for the future receipt or delivery of the entity's own equity instruments.

Equity instrument is any contract that evidences a residual interest in the assets of an entity after deducting all of its liabilities.

Classification and recognition

Classification of a financial instrument, or its component parts takes place on initial recognition. Each instrument is classified as a financial liability, a financial asset or an equity instrument in accordance with the substance of the contractual arrangement and the definitions of a financial liability, a financial asset and an equity instrument.

Notes to the financial statement for the period ended March 31, 2025 (All amounts in USD)

3. Significant Accounting Policies (Continued)

Financial Instruments (Continued)

Financial assets classification:

The group classifies financial assets into the following categories:

- Financial assets subsequently measured at fair value through profit or loss.
- Financial assets subsequently measured at fair value through other comprehensive income (OCI)
- Financial assets subsequently measured at amortised cost.

Financial liabilities classification:

The group classifies financial liabilities into the following categories:

- Financial liabilities subsequently measured at amortised cost.
- Financial liabilities subsequently measured at fair value through profit or loss.

Initial recognition and measurement

Financial assets and financial liabilities are recognized on the trade date when the Group becomes a party to the contractual provisions of the instrument. Except for trade receivables which do not contain a significant financing component, financial assets and financial liabilities are measured at fair value at initial recognition. Transaction costs directly attributable to the acquisition of financial assets or issuance of financial liabilities other than financial assets measured at fair value through profit or loss ("financial assets at FVTPL") and financial liabilities measured at fair value through profit or loss ("financial liabilities at FVTPL"), are added to the fair value of the financial assets or deducted from the fair value of financial liabilities at initial recognition. Transaction costs directly attributable to the acquisition of financial assets at FVTPL and financial liabilities at FVTPL are recognized in profit or loss.

Financial assets

At initial recognition, all financial assets are classified as "financial assets measured at amortized cost, financial assets measured at fair value through other comprehensive income ("financial assets at FVTOCI")" or "financial assets at FVTPL."

a) Financial assets measured at amortized cost

Financial assets are classified as financial assets measured at amortized cost if both of the following conditions are met:

- The financial asset is held within a business model whose objective is to hold financial assets in order to collect contractual cash flows and
- The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

After initial recognition, the financial assets are measured at amortized cost using the effective interest method, less any impairment loss. Interest revenue using the effective interest method is recognized in profit or loss.

Notes to the financial statement for the period ended March 31, 2025 (All amounts in USD)

3. Significant Accounting Policies (Continued)

Financial Instruments (Continued)

b) Financial assets at FVTOCI (debt instruments)

Financial assets are classified as financial assets at FVTOCI (debt instruments) if both of the following conditions are met:

- The financial asset is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets and
- The contractual terms of the financial asset give rise on specified dates to cash flows that are solely
 payments of principal and interest on principal amount outstanding.

After initial recognition, the financial assets are measured at fair value, and any gain or loss resulting from changes in fair value is recognized in other comprehensive income, except for impairment gains or losses and foreign exchange gains or losses. When the financial asset is derecognized, the cumulative gain or loss recognized in other components of equity is reclassified from equity to profit or loss as a reclassification adjustment.

c) Financial assets at FVTOCI (equity instruments)

The Group has made an irrevocable election for equity instruments, with some exceptions, to present subsequent changes in fair value in other comprehensive income, and classifies such instruments as financial assets at FVTOCI.

After initial recognition, the financial assets are measured at fair value, and any gain or loss resulting from changes in fair value is recognized in other comprehensive income. When the financial asset is derecognized or the fair value has significantly decreased, the cumulative gain or loss recognized in other component of equity is transferred to retained earnings. Dividends on such financial assets are recognized in profit or loss unless the dividend clearly represents a recovery of part of the cost of the investment.

d) Financial assets at FVTPL

Financial assets not classified as financial assets measured at amortized cost or financial assets at FVTOCI are classified as financial assets at FVTPL. After initial recognition, the financial assets are measured at fair value with subsequent changes in fair value recognized in profit or loss.

Impairment of financial assets

Loss allowances are recognized for expected credit losses for financial assets measured at amortized cost or debt instruments classified as financial assets at FVTOCI.

At the end of each quarter, the loss allowance is measured for a financial asset at an amount equal to the lifetime expected credit losses if the credit risk on that financial asset has increased significantly since initial recognition. The loss allowance is measured for a financial asset at an amount equal to 12-month expected credit losses if the credit risk on that financial asset has not increased significantly since initial recognition.

Notes to the financial statement for the period ended March 31, 2025 (All amounts in USD)

3. Significant Accounting Policies (Continued)

Financial Instruments (Continued)

However, for trade receivables, contract assets and lease receivables, the loss allowance is always measured at an amount equal to lifetime expected credit losses.

If all or part of a financial asset is determined to be unrecoverable based on reasonable grounds, the financial asset is considered to be default.

The amounts of loss allowances are calculated to reflect the following factors:

- An unbiased and probability-weighted amount that is determined by evaluating a range of possible outcomes
- The time value of money
- Reasonable and supportable information that is available without undue cost or effort about past events, current conditions, and forecasts of future economic conditions.

When evaluating whether credit risk has increased significantly, the Group considers reasonable and supportable information that is available, as well as past-due information. Moreover, if there is objective evidence of credit impairment such as legal liquidation procedures due to the bankruptcy of a borrower, the Group considers the financial asset to be a credit-impaired financial asset. The carrying amount of such financial asset is directly reduced by the amount that clearly cannot be recovered in the future and the corresponding loss allowance is also reduced.

Financial liabilities

At initial recognition, all financial liabilities are classified as financial liabilities at FVTPL or financial liabilities measured at amortized cost.

a) Financial liabilities at FVTPL

Derivative financial liabilities, financial liabilities designated as financial liabilities at FVTPL and contingent consideration recognized in a business combination that meets the definition of financial liabilities, are classified as financial liabilities at FVTPL. After initial recognition, the financial liabilities are measured at fair value with subsequent changes in fair value recognized in profit or loss.

b) Financial liabilities measured at amortized cost

Financial liabilities not classified as financial liabilities at FVTPL are classified as financial liabilities measured at amortized cost. After initial recognition, the financial liabilities are measured at amortized cost using the effective interest method.

Derecognition

Financial assets are derecognized when the contractual rights to the cash flows from the financial asset expire or the contractual rights to receive the cash flows of the financial asset have been transferred and substantially all the risks and rewards of ownership of the financial asset are transferred or the contractual rights to receive the cash flows of the financial asset have been transferred but substantially

Notes to the financial statement for the period ended March 31, 2025 (All amounts in USD)

3. Significant Accounting Policies (Continued)

Financial Instruments (Continued)

all the risks and rewards of ownership of the financial asset are neither transferred nor retained and control of the financial asset has not been retained.

Financial liabilities are derecognized when a financial liability is extinguished, i.e., when the obligation specified in the contract is discharged or cancelled or expired.

Effective Interest rate (EIR) method:

The effective interest method is a method of calculating the amortized cost of a financial instrument and of allocating interest income or expense over the relevant period. The effective interest rate is the rate that exactly discounts future cash receipts or payments through the expected life of the financial instrument, or where appropriate, a shorter period.

Off-setting

Financial assets and liabilities are offset and the net amount is presented in the balance sheet when the company currently has a legally enforceable right to offset the recognized amounts and intends either to settle on a net basis or to realize the asset and settle the liability simultaneously.

Fair Value Measurement

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

The fair value measurement assumes that the transaction to sell the asset or transfer the liability takes place either:

- In the principal market for the asset or liability, or
- In the absence of a principal market, in the most advantageous market for the asset or liability.

A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefit by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The company uses valuation techniques that are appropriate in the circumstances and for which sufficient data is available to measure fair value, maximizing the use of relevant observable inputs and minimizing the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the financial statement are categorized within the fair value hierarchy. The fair value hierarchy is based on inputs to valuation techniques that are used to measure fair value that are either observable or unobservable and consists of the following three levels:

Notes to the financial statement for the period ended March 31, 2025 (All amounts in USD)

3. Significant Accounting Policies (Continued)

Fair Value Measurement (Continued)

- Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities
- Level 2 inputs are other than quoted prices included within level 1 that are observable for the asset or liability either directly (i.e. as prices) or indirectly (i.e. derived prices)
- Level 3 inputs are not based on observable market data (unobservable inputs). Fair values are
 determined in whole or in part using a valuation model based on assumption that are neither
 supported by prices from observable current market transactions in the same instrument nor are
 they based on available market data.

Cash and Cash Equivalents

Cash and cash equivalent includes only cash at bank, in hand short-term, (generally with original maturity of three months or less) highly liquid investments that are readily convertible to a known amount of cash and which are subject to an insignificant risk of changes in value. Cash equivalents are held for the purpose of meeting short-term cash commitments rather for investment or other purposes.

It is the Company's policy to monitor the financial strength of the bank that hold its deposits on an ongoing basis. During the normal course of business, the Company may maintain cash balances in excess of the FDIC insurance limit. At times, the amounts held may exceed federally insured limits. The Company has not experienced any losses in such amounts. At year ended March 31, 2025 the company has no uninsured balance.

Trade and other Receivables

During the reporting period, the Company entered into factoring arrangements involving the sale of trade receivables to third-party financial institutions (factors) to enhance liquidity. These arrangements are structured as recourse factoring, whereby the Company retains the credit risk associated with the receivables sold. In the event of non-payment by the original debtor, the factor has the right to seek recovery from the Company.

In accordance with IFRS 9 – Financial Instruments, the derecognition of financial assets is contingent upon the transfer of substantially all risks and rewards of ownership. Under recourse factoring, the Company retains significant exposure to credit risk, and therefore, the risks and rewards are not substantially transferred.

As a result the factored receivables are not derecognized from the statement of financial position. The cash received from the factor is recognized as a financial liability. The liability is measured at the amount of cash received, adjusted for any fees or interest payable under the factoring agreement.

Trade and other Payables

Trade payables are obligations to pay for goods or services that have been acquired in the ordinary course of business from suppliers. Trade payables are classified as current liabilities if payment is due within one year or less (or in the normal operating cycle of the business if longer). If not, they are presented as non-current liabilities.

Notes to the financial statement for the period ended March 31, 2025 (All amounts in USD)

3. Significant Accounting Policies (Continued)

Revenue from Contract with Customers

Revenue Recognition

Revenue from contracts with customers is recognised when control of the goods or services are transferred to the customer at an amount that reflects the consideration to which the Company expects to be entitled in exchange for those goods or services. The Company has generally concluded that it is the principal in its revenue arrangements, since it is the primary obligor in all of its revenue arrangement, as it has pricing latitude and is exposed to inventory and credit risks. Revenue is stated net of returns, chargebacks, taxes, rebates and other similar allowances. These are calculated on the basis of historical experience and the specific terms in the individual contracts.

In determining the transaction price, the Company considers the effects of variable consideration, the existence of significant financing components, noncash consideration, and consideration payable to the customer (if any). The Company estimates variable consideration at contract inception until it is highly. Probable that a significant revenue reversal in the amount of cumulative revenue recognised will not occur when the associated uncertainty with the variable consideration is subsequently resolved.

Sale of Goods

Revenue is generated primarily from Selling of Pharmaceuticals and other related products. Revenue is recognised at the point in time when the performance obligation is satisfied and control of the goods is transferred to the customer in accordance with the terms of customer contracts.

In revenue arrangements with multiple performance obligations, the Company accounts for individual products and services separately if they are distinct- i.e. if a product or service is separately identifiable from other items in the arrangement and if a customer can benefit from it. The consideration is allocated between separate products and services in the arrangement based on their stand-alone selling prices. Revenue from sale of by products are included in revenue.

A contract liability is the obligation to transfer goods to the customer for which the Company has received consideration from the customer. Contract liabilities are recognised as revenue when the Company performs under the contract.

Sale of Services

Revenue is recognized from rendering of services when the performance obligation is satisfied and the services are rendered at point in time or over the period of time in accordance with the terms of customer contracts. In certain instances, income from licensing arrangement arises from the Completion of certain milestones over certain period of time and recognised and when the performance obligation is satisfied. Revenue is measured based on the transaction price, which is the consideration, as specified in the contract with the customer. Revenue also excludes taxes collected from customers. A contract liability is the obligation to render services to the customer for which the Company has received consideration from the customer. Contract liabilities are recognised as revenue when the Company performs under the contract.

Notes to the financial statement for the period ended March 31, 2025 (All amounts in USD)

3. Significant Accounting Policies (Continued)

Revenue from Contract with Customers (Continued)

Profit Sharing Revenues

The Company from time to time enters into arrangements for the sale of its products in certain markets. Under such arrangements, the Company sells its products to the business partners at a base purchase price agreed upon in the arrangement and is also entitled to a profit share which is over and above the base purchase price. The profit share is typically dependent on the ultimate net sale proceeds or net profits, subject to any reductions or adjustments that are required by the terms of the arrangement. Revenue in an amount equal to the base purchase price is recognised in these transactions upon delivery of products to the business partners. An additional amount representing the profit share component is recognised as revenue only to the extent that it is highly probable that a significant reversal will not occur.

Accrued income refers to revenue a company has earned but not yet received in cash or cash equivalents. It represents earnings recognized before payment is received and is recorded as a current asset on the balance sheet. The concept is based on the accrual accounting principle: income is recognized when earned, not when paid, ensuring financial statements reflect all earned revenue. For example, a company that generates revenue from selling goods or services on credit records accrued income if payment is still pending.

Senores enters into contractual agreement for profit sharing with the marketer for sale of pharmaceuticals products manufactured by Havix with Senores's ANDA. As Havix transferred the products to marketer for further sale senores recognize the profit sharing income in profit and loss and related asset is created balance sheet as accrued income. When marketer sold products to end consumer; Senores recognize the amount from the accrued income to account receivable based on the quarterly / monthly sale report provide by the marketer. Senores expects to realize the amount of accrued income within 12 months from the end of the reporting year; therefore, classified as current asset in the financial statement. Senores recognize the amount in accrued income only when entity expect that the significant reversal of same will not probable in future.

Out-licensing Arrangements

Revenues include amounts earned from product out-licensing agreements. These arrangements typically consist of an initial up-front payment on inception of the license and subsequent payments dependent on achieving certain milestones in accordance with the terms prescribed in the agreement. Non-refundable upfront license fees received in connection with product out-licensing agreements are deferred and recognised over the period in which the Company has continuing performance obligations. Milestone payments which are contingent on achieving certain clinical milestones are recognised as revenues either on achievement of such milestones, if the milestones are considered substantive, or over the period the Company has continuing performance obligations, if the milestones are not considered substantive.

Notes to the financial statement for the period ended March 31, 2025 (All amounts in USD)

3. Significant Accounting Policies (Continued)

Revenue from Contract with Customers (Continued)

Sales Return

The Company accounts for sales returns accrual by recording an allowance for sales returns concurrent with the recognition of revenue at the time of a product sale. This allowance is based on the Company's estimate of expected sales returns. With respect to established products, the Company considers its historical experience of sales returns, levels of inventory in the distribution channel, estimated shelf life, product discontinuances, price changes of competitive products, and the introduction of competitive new products, to the extent each of these factors impact the Company's business and markets. With respect to new products introduced by the Company, such products have historically been either extensions of an existing line of product where the Company has historical experience or in therapeutic categories where established products exist and are sold either by the Company or the Company's competitors.

Disaggregated Revenue

Disaggregate revenue recognised from contracts with customers into categories that depict how the nature, amount, timing and uncertainty of revenue and cash flows are affected by economic factors. An entity shall apply the guidance in paragraphs B87–B89 when selecting the categories to use to disaggregate revenue.

The extent to which an entity's revenue is disaggregated for the purposes of this disclosure depends on the facts and circumstances that pertain to the entity's contracts with customers. Some entities may need to use more than one type of category to meet the objective for disaggregating revenue. Other entities may meet the objective by using only one type of category to disaggregate revenue.

When selecting the type of category (or categories) to use to disaggregate revenue, an entity shall consider how information about the entity's revenue has been presented for other purposes, including all of the following:

- a) Disclosures presented outside the financial statements (for example, in earnings releases, annual reports or investor presentations);
- b) Information regularly reviewed by the chief operating decision maker for evaluating the financial performance of operating segments; and
- c) Other information that is similar to the types of information identified in paragraph B88 (a) and (b) and that is used by the entity or users of the entity's financial statements to evaluate the entity's financial performance or make resource allocation decisions.

The Group recognizes revenue from the following major sources:

- Out-licensing Fees
- Trading Sales
- Profit from distribution
- Sale of goods & services

Notes to the financial statement for the period ended March 31, 2025 (All amounts in USD)

3. Significant Accounting Policies (Continued)

Foreign Currency

IAS 21 requires all the foreign exchange differences to be recorded immediately in the Profit and Loss account. IAS 21 requires entity to determine functional currency and measure results and financial position in that currency. Functional currency is the currency of the primary economic environment whereas foreign currency is the currency other than the functional currency. If financial statements are presented in any other currency other than functional currency, IAS 21 requires assets/liabilities to be translated at closing rate and income/expenses at average rate. Exchange differences on translation of foreign currency monetary items are recognised in the profit and loss account. In the consolidation of financial statements of foreign operations the translation difference on monetary items is taken to other comprehensive income.

Finance Income / Finance Cost

Finance income represent interest income on fund invested. Interest income is recognised as it accrues in profit or loss, using the effective interest method. The effective interest rate is the rate that exactly discounts estimated future cash receipts through expected life of the financial asset to the gross carrying amount of the financial asset. When calculating the effective interest rate, the company estimates the expected cash flows by considering all the contractual terms of the financial instrument but does not consider the expected credit losses. Finance costs comprise interest expense on borrowing. Interest expense is recognised as it accrues in profit or loss, using the effective interest method.

Foreign currency gains and losses on financial assets and financial liabilities are reported on a net basis as either finance income or finance cost depending on whether foreign currency movements are in a net gain or net loss position.

Income Taxes

Income tax expense consists of current and deferred tax. Income tax expense is recognised in profit or loss except to the extent that it relates to items recognised in OCI or directly in equity, in which case it is recognised in OCI or directly in equity respectively. Current tax is the expected tax payable on the taxable profit for the year, using tax rates enacted or substantively enacted by the end of the reporting period, and any adjustment to tax payable in respect of previous years. Current tax assets and tax liabilities are offset where the Company has a legally enforceable right to offset and intends either to settle on a net basis, or to realise the asset and settle the liability simultaneously.

Current Tax

The current income tax charge is calculated on the basis of the tax laws enacted or substantively enacted at the end of the reporting period. Management periodically evaluates positions taken in tax returns with respect to situations in which applicable tax regulation is subject to interpretation. It establishes provisions, wherever appropriate, on the basis of amounts expected to be paid to the tax authorities.

Current tax is recognised in the Statement of Profit and Loss, except to the extent that it relates to items recognized in Other Comprehensive Income or directly in equity. In this case, the tax is also recognised in Other Comprehensive Income or directly in equity, respectively.

Notes to the financial statement for the period ended March 31, 2025 (All amounts in USD)

3. Significant Accounting Policies (Continued)

Income Taxes(Continued)

Current tax for current and prior periods is recognized at the amount expected to be paid to or recovered from the tax authorities, using the tax rates and tax laws that have been enacted or substantively enacted by the balance sheet date.

Current tax assets and current tax liabilities are offset, where company has a legally enforceable right to set off the recognized amounts and where it intends either to settle on a net basis, or to realize the asset and settle the liability simultaneously.

Deferred Tax

Deferred tax is recognised on temporary differences between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profit.

Deferred tax is measured at the tax rates that are expected to be applied to the temporary differences when they reverse, based on the laws that have been enacted or substantively enacted by the end of the reporting period. Deferred tax assets and liabilities are offset if there is a legally enforceable right to set off corresponding current tax assets against current tax liabilities and the deferred tax assets and deferred tax liabilities relate to income taxes levied by the same tax authority on the Company.

The Company recognises a deferred tax asset arising from unused tax losses or tax credits only to the extent that the entity has sufficient taxable temporary differences or there is convincing other evidence that sufficient taxable profit will be available against which the unused tax losses or unused tax credits can be utilized by the entity.

A deferred tax asset is recognised to the extent that it is probable that future taxable profits will be available against which the temporary difference can be utilised. Deferred tax assets are reviewed at each reporting date and are reduced to the extent that it is no longer probable that the related tax benefit will be realised. Withholding tax arising out of payment of dividends to shareholders under the Indian Income tax regulations is not considered as tax expense for the Company and all such taxes are recognised in the statement of changes in equity as part of the associated dividend payment.

Related Parties

A related party is a person or entity with the ability to control or jointly control the other party, or exercise significant influence over the other party, or vice versa, or an entity that is subject to common control, or joint control. As a minimum, the following are regarded as related parties of the reporting entity.

Notes to the financial statement for the period ended March 31, 2025 (All amounts in USD)

3. Significant Accounting Policies (Continued)

Earnings per Share

The Company presents basic and diluted earnings per share ("EPS") data for its equity shares. Basic EPS is calculated by dividing the profit or loss attributable to equity shareholders of the Company by the weighted average number of equity shares outstanding during the period. Diluted EPS is determined by adjusting the profit or loss attributable to equity shareholders and the weighted average number of equity shares outstanding for the effects of all dilutive potential ordinary shares, which includes all stock options granted to employees.

The number of equity shares and potentially dilutive equity shares are adjusted retrospectively for all periods presented for any share splits and bonus shares issues including for changes effected prior to the approval of the financial statements by the Board of Directors.

Cash flows Statement

Cash flows are reported using indirect method whereby profit for the period is adjusted for the effects of the transactions of non-cash nature, any deferrals or accruals of past or future operating cash receipts and payments and items of income or expenses associated with investing and financing cash flows. The cash flows from operating, investing and financing activities of the Company are segregated.

Events occurring after reporting date

Where events occurring after the balance sheet date provides evidence of conditions that existed at the end of the reporting period, the impact of such events is adjusted within the financial statements. Otherwise, events after the balance sheet date of material size or nature are only disclosed.

19. Financial Risk Management

The Company's activities expose it to a variety of financial risks, including market risk, credit risk and liquidity risk. The company's focus is to foresee the unpredictability of financial markets and seek to minimize potential adverse effects on its financial performance. Risk assessment and management policies and processes are reviewed regularly to reflect changes in market conditions and the Company's activities. The Board of Directors oversee compliance with the Company's risk management policies and procedures, and reviews the risk management framework.

Credit risk

Credit risk is the risk of financial loss to the Company if a customer or counterparty to a financial instrument fails to meet its contractual obligations, and arises principally from the Company's receivables from customers, loans and investments. Credit risk is managed through credit approvals, establishing credit limits and continuously monitoring the creditworthiness of counterparty to which the Company grants credit terms in the normal course of business.

Notes to the financial statement for the period ended March 31, 2025 (All amounts in USD)

19. Financial Risk Management(Continued)

Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they become due. The Company manages its liquidity risk by ensuring, as far as possible, that it will always have sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions, without incurring unacceptable losses or risk to the Company's reputation.

Market risk

Market risk is the risk of loss of future earnings, fair values or future cash flows that may result from adverse changes in market rates and prices (such as interest rates, foreign currency exchange rates and commodity prices) or in the price of market risk-sensitive instruments as a result of such adverse changes in market rates and prices. The Company is exposed to market risk primarily related to foreign exchange rate risk, interest rate risk and the market value of its investments.

Interest rate risk

The Company is exposed to interest rate risk arising from its borrowings at variable interest rates, which are primarily linked to the Secured Overnight Financing Rate (SOFR). As of March 31, 2025 all loan facilities are subject to floating interest rates. Consequently, future cash outflows may fluctuate in response to changes in market interest rates.

Interest rate risk is defined as the risk that the fair value or future cash flows of a financial instrument will fluctuate due to changes in market interest rates. This risk arises mainly from the Company's variable-rate borrowings. Given the current market practice, banks predominantly offer financing at variable rates, making this exposure an inherent business risk.

The Company provides both qualitative and quantitative disclosures to enable users of the financial statements to evaluate the nature and extent of risks arising from financial instruments. As of March 31, 2025, the Company has outstanding variable-rate borrowings of USD 950,396, with an effective interest rate of 8.08% (SOFR 4.28% + Spread 3.80%).

A change of ± 100 basis points (1%) in the interest rate would have the following impact on annual interest expense:

Scenario	Interest Rate	Annual Interest Expense (USD)
+1.0% increase in rate	9.08%	86,296
-1.0% decrease in rate	7.08%	67,288

20. Events After Reporting Period

The Company has evaluated events occurring after reporting period from the date of financial statements through May 14, 2025, the date these financial statements were issued. Company has evaluated all events and transactions that occurred after the date of financials through the date of this report, company identified effect of the United States imposed a around 25% tariff on pharmaceutical and related products imported from India. The Company is actively monitoring trade negotiations and implementing mitigation strategies to address these risks.
